

FILTRATION PLANT NEARLY READY

OPERATING BY END OF MONTH

Water Supply Then Free From
Impurities and Chlorine
Taste.

LAST OBSTACLE OVERCOME

Concrete Wall Successfully Dynamited
to Connect Pumps—Delayed Test
Run Ten Days—Capacity is 6,000,
000 Gallons a Day.

In the nursery rhymes they tell
about "There was a little girl and
she had a little curl that hung down
in the middle of her forehead. And
When she was good she was very
very good, but when she was bad
she was horrid."

Concrete is something like that.
When concrete is good it is very
very good, but when it's bad it's bad.
Much depends on who lays the con-
crete and how they do it. An illus-
tration of the difference in concrete
is furnished at the Tonawanda water
works. There a well laid piece of
concrete has succeeded in delaying
the operation of the filtration plant
for some 10 days of two weeks.

Dynamite removed the obstacle
and the plant will be ready to op-
erate about July 25.

Fifteen years ago, a concrete base
was laid at the pumping station on
Goose Island about the big pump
furthermost from the river front.
The concrete was laid by the em-
ployees at the station. They had
genuine imported Portland cement
to mix and used care in mixing it.
The concrete was laid and rein-
forced with expanding metal.

Active in that work were Frank
F. Chase who is today superintendent
of public works of Tonawanda,
and Kirk Robbins who is today chief
engineer in charge of the pumping
station. These two men are the old-
est employees of the city in the water
department in point of service. Mr.
Robbins having about a month the
best of it. He has served 28 years
at the pumping station.

JURY TRIAL DEMANDED IN PLUMBING INSPECTION CASE

Peter Stark, Defendant, is Granted
Second Postponement—Hearing Set
for July 26.

A jury trial was demanded by Peter
Stark in city court this morning when
the case against him for violation of
the city ordinance regulating installa-
tion and inspection of plumbing in
residences was called.

Stark was arrested on complaint of
Conrad Near, city plumbing inspector.
The inspector charges that Stark in-
stalled bathroom facilities in a house
he owns at Ninth and Stark streets,
without a licensed plumber doing the
work nor completing the job in such
manner as to conform to the city or-
dinances for inspection and installa-
tion.

This was the second time the case
has been called in city court. At the
first arraignment, Stark requested
postponement to secure counsel. To-
day a further postponement was
drawn and trial deferred until Tues-
day, July 26, in order to obtain the
jury.

Near states this is the second of
fense of Stark in putting in plumbing
without regard to city ordinances. He
stated the first offense was in putting
in bathroom facilities at the Stark
residence, 13 Stark street, about six
months ago. At that time, the inspec-
tor says the board required re-installation
of the plumbing in accordance
with the ordinances.

DELEGATE TO KNIGHTS OF PYTHIAS CONVENTION

William F. G. Janowsky, as alter-
nate delegate, will represent North
Star Lodge, No. 337, Knights of Pyth-
ias, of the Twin Cities at the Grand
Lodge convention at Kingston, N. Y.,
from July 26 to 29. Mr. Janowsky
will leave Monday, July 25, for
Kingston.

NORTH TONAWANDA, N. Y.

BURGLARS GET \$250 WORTH OF CIGARS

Among the recent burglaries in
North Tonawanda was that which took
place a few nights ago, at the soft
drink stand conducted by Charles
Kashoum at No. 468 Oliver street. The
building was entered through the
basement, from which the burglars
forced their way into the store, help-
ed themselves to cigars and cigar-
ettes valued at \$250 and a small
amount of change in the till and de-
parted unobserved. No trace of the
thieves or the stolen goods is report-
ed.

WHISKEY RAID PROVES FUTILE

"Dude" Walters Discharged on
Accusation of Harbor-
ing Drunks.

EVIDENCE WAS LACKING

State Troopers Invaded Grand Island
Resort with Search Warrant—Judicial
Stage Set in Sweltering Con-
fines of Town Hall.

The raid last week by state troopers
upon the resort of William (Dude)
Walters near the upper Grand Island
ferry landing went up in smoke yes-
terday after a hearing before Justice
of the Peace Kaegbein, who discharged
the defendant for lack of evidence.

The troopers raided Walters' place
last week on a search warrant but
failed to find any liquor, for which
they were looking. Determined their
efforts should not go for nothing, they
then arrested Walters on the wild
charge of harboring drunks, seven of
whom the troopers asserted they
found on the Walters' premises.

A preliminary hearing before Jus-
tice Kaegbein was held immediately
after the raid last week. The hearing
was staged in the yard of the jus-
tice's residence under the spreading
branches of an old apple tree. Walters
asked for an adjournment to obtain
counsel. He was represented at the ad-
journed hearing yesterday by Attor-
ney Allen M. Lynch.

In deference to the attorney's dig-
nity as an officer of the court, the
hearing was held yesterday in the
town hall, despite protests of most all
concerned. Preferences were ex-
pressed for holding the hearing "In the
Shade of the Old Apple Tree," in tune
with the old song, but the justice over-
ruled the preferences and set the judi-
cial stage in the sweltering confines
of the town hall.

The troopers testified to a thor-
ough search of the Walters' premises
failing to disclose any liquor. The al-
leged drunks produced yesterday as
evidence were not intoxicated and
court and Walters, his bartender and
several witnesses asserted the men
had not been drunk as alleged by the
troopers when the raid was made.

For lack of evidence, Justice Kaeg-
bein dismissed the case and the at-
tendante at the hearing adjourned
from the hot courtroom to the shade
of that apple tree, everybody express-
ing satisfaction except the troopers.

RAINS ST. SWITHIN'S DAY; ADAGE SAYS 'TILL RAIN EVERY DAY FOR SIX WEEKS

An old adage says if it rains on
St. Swithin's Day it will rain ev-
ery day for six weeks thereafter.
Today is St. Swithin's Day and it
rained.

Local weather prognosticators
say the St. Swithin's Day adage
has often proved true. These rains
in the past have for most part
been slight showers and of short
duration, almost always benefit-
ing crops.

St. Swithin's Day rains appear
to have ushered in a break in the
intense heat wave that has grip-
ped this section for three weeks.
The temperature today was de-
cidedly cooler and the air free
from humidity.

Recent reports state that Andrew
Carnegie established 2,811 libraries.

After the show go to 10 Broad street
for a nice cold Root Beer. 12-14-16

\$300,000 FOR SEWER PROJECT

Taxpayers to Vote on Extension
of System to Outlying
Districts.

FILTRATION SIDETRACKED

Not as Important as Additional Sewer
Facilities in North Tonawanda—Im-
possible to Go Ahead with Both
Projects at Same Time.

Taxpayers of North Tonawanda
will be called upon shortly to vote on
a proposition to raise \$300,000 for an
extension of the city sewer system.
This disposition of the sewer prob-
lem in North Tonawanda was decided
on after a conference with John La-
Boon, representing J. N. Chester
Engineers of Pittsburgh, Pa., by mem-
bers of the board of public works last
night. The time of holding the elec-
tion will be taken under consideration
at a meeting of the board on Mon-
day night, July 25.

The conference last night was called
by the commissioners that they
might thoroughly acquaint themselves
with the plans made by the engineers
under a comprehensive survey for the
extension of the city sewers. When
the plans were completed several
months ago, the cost of carrying out
the project for providing sewers
for all parts of the city and the
erection of a disposal plant was
placed at \$750,000. LaBoon stated that
the work can be carried out now for
from twenty to twenty-five per cent.
less.

One of the principal questions sub-
mitted by the commissioners was
whether the construction of a part of
the system, taking care of those sec-
tions of the city most in need of sew-
ers, could be carried out without re-
ducing the efficiency of the system,
as planned. LaBoon said that such
construction as the commissioners
wish to make can be executed without
proving detrimental in the least and
that the cost of such work will not
exceed \$300,000. This cost would in-
clude:

TONAWANDA BOY WINS CORNELL SCHOLARSHIP

Clarence G. Eaton Will Enter Ithaca
University in Fall—Honor Student
at South Side High School.

When Clarence G. Eaton, son of Mr.
and Mrs. Herbert C. Eaton of No. 15
Hill place finished his high school
course in Tonawanda last month with
a percentage of 96, the highest attain-
ed by any student in the history of the
institution, the members of the faculty
manifested the greatest pride in his
accomplishment. He was the recipient
of congratulations from the students
and his friends.

Now they have another opportunity
to congratulate young Eaton. He fol-
lowed up his good work in school by
proving that the education which he
received in Tonawanda fitted him to
accomplish greater things than any
student from other schools in Erie
county in the recently conducted Cor-
nell scholarship examinations.

Yesterday young Eaton received a
communication from the examining
board, informing him that he had not
only passed the test with a rate well
over 90 but that he had attained the
highest standing of any of the stu-
dents who tried the recent examina-
tion. His paper carried the designa-
tion of No. 1 in the list of successful
students in the county.

Eaton will enter Cornell this fall.
Eaton graduated from Tonawanda
high school with a percentage of 96
for the four-year course. He will
take a course in civil engineering at
Cornell and is this summer gaining
practical experience through employ-
ment with W. L. Rose on a Tona-
wanda paving contract.

Wieringen, July 15.—Germany's
Crown Prince is looking for a regular
job. In his own words he is quite
fed up with the enforced life of
monotonous inactivity on the lonely
little submarine island which the
sturdy Dutch by their strong dike
robbed from the green gray depths
of the Zuider Zee.

Not that his days are not occu-
pied from dawn until dark; his cor-

respondence, his memoirs, his horse-
shoe making at the village forge, his
motorcycle, violin and sketchbook,
his boxing instructor engage every
minute of his time. But the
Crown Prince is tired of it all; he
craves a regular job.

"I must get out of here and I am
going to do so," he said. "I want to
turn my energy into some real con-
structive work along the line of my
abilities." After you've made the
tedious journey to the secluded
island and seen the primitive ac-

FOUR CANDIDATES FOR ALDERMAN NOMINATION

Four candidates for the Republican
nomination for alderman in the third
ward have placed designation peti-
tions in circulation. All are from the
second district of the ward. They are
Arthur Molinow, Charles Meyers,
Walter Hemblet and Theodore Werth.
Besides these men, who seek to
succeed Andrew Joerg, Jr., on the
board of aldermen, it is understood
that the first district of the ward will
have one or more candidates for the
nomination.

Republican leaders say that candi-
dates for the Republican nomination
for alderman in the third ward will
undoubtedly be more numerous than
in any other ward in the Tonawanda.
All of the candidates are well known
in Gratiwick.

EXODUS TO GEORGIAN BAY REGION STARTS

C. J. Wattengel and family of Swee-
ney street, accompanied by friends
from Hamburg, leave tomorrow to
motor on a trip to Georgian Bay to be
gone about 10 days. The party will
include Mrs. Wattengel, Miss Helen
Wattengel, and Mr. and Mrs. George
J. Christgau of Hamburg.

ULSTER LEADER SUMMONED TO LONDON CONFERENCE; PREMIER EMPHASIZES UNITY IN IRELAND

London, July 15.—Eamonn De Valera, leader of the Irish
republicans, and Prime Minister Lloyd George had another con-
ference in the cabinet room at Downing street this forenoon,
continuing their discussion of the basis for the proposed con-
ference for a settlement of the Irish problem.

The conference which lasted about an hour and a half, was
again a two-man talk. In an adjoining room, however, Sir Ham-
ar Greenwood, the chief secretary for Ireland; Lord Curzon, the
foreign secretary; Art O'Brien, president of the Gaelic league in
London, and Robert C. Barton of the Irish delegation were on
hand should their presence be desired.

On leaving Downing street Mr. De Valera said there would not be any
further meeting today and that he "did not think" there would be a
meeting Saturday. It was announced that the communique agreed upon by
the conferees would be issued later.

The long duration of yesterday's initial conference was generally con-
sidered the most hopeful sign in connection with the negotiations. From
semi-official sources it was learned that De Valera had emphasized the
importance of Irish unity and that he wants only one parliament for the
whole of Ireland.

Because of this, it was said to be necessary that Sir James Craig,
Ulster premier, should be summoned at once. He was to arrive this after-
noon and was expected to confer with Lloyd George this evening.

GOVERNORS OF 16 STATES ARE FOR DISARMAMENT

New York, July 15.—Governors of 16 states, representing more than
20,000,000 persons, today endorsed President Harding's disarmament con-
ference. In messages, these executives declared themselves for armament
limitation on the following grounds:

Prevention of wars.
Relief from taxation burdens.
Improvement of the general world economic situation.
Governor Percival D. Baxter of Maine, summed up the general atti-
tude of his colleagues when he declared that the nations of the world
must disarm or go into moral and financial bankruptcy.
To this Governor D. W. Davis of Idaho, added that we cannot take to
achieving peace with knives in our hands.

"SUICIDE WAVE" FOLLOWS IN WAKE OF DEPRESSION

Sacramento, Cal., July 15.—That a "suicide wave" is spreading over
California as a result of business depression and economic disturbances
common to after-war periods, was the statement of L. E. Ross, head of the
State Bureau of Vital Statistics, in commenting on his official report on
suicides, made public today, which states that 314 Californians took their
own lives during the first four months of this year. Of this number only
seventy-eight were women.

Ross's report covers January, February, March and April of 1921. If
the suicide rate maintained during the first four months continues, Cali-
fornia will have 942 suicides during the year, the greatest number of any
year in the history of the State except 1915.

"During 1920 business was good and work was plentiful," declared
Ross, "and consequently we had only 695 suicides.

The statistician declared that if economic conditions improve suicides
will become less frequent, but if they fail to improve more suicides will
be recorded than ever before in the history of the State. Such conditions,
he said, have been found to exist during the reaction which follows every
war.

POWERFUL X-RAY WILL CURE DREAD CANCER

London, July 15.—Cancer is curable!
That is the announcement officially issued by the authorities of the
West London Hospital.

Experiments have been carried on in the hospital for months, and the
experts investigating the subject have received invaluable assistance from
the University of Erlangen, Bavaria, where Professor Herman Wintz has
been treating the disease with extremely powerful X-rays.

"Surgery as a treatment for cancer may be entirely out of date in a
few years time through a special form of X-rays now in use at our hospital,"
was the announcement made by one of the officials of the West London
Hospital.

"The ordinary X-ray has been only partially successful in the treat-
ment of this dread disease, owing to the limitations of available apparatus.
The new treatment makes it possible to use a much greater intensity of
X-rays and yet does not injure the patient in the slightest degree.

SEISMOLOGIST WARNS OF DANGER FROM LIGHTNING

Washington, July 15.—When the lightning flashes and the thunder
booms your chance of being struck is just one in a million.

That is the expert opinion expressed by W. J. Humphreys, of the
Seismological Department of the Weather Bureau. Figure it out—one
hundred million people in the country and an annual lightning death rate
of not more than 100.

Does it make any difference whether you live in one part of the
country or another? Get this:

On the Pacific Coast records show that the annual thunderstorm
schedule provides rarely more than two or three performances. In the
South, Florida especially, thunder storms are much more frequent, but less
dangerous, because of the fact that the clouds usually travel higher in that
section.

ALONE FOR EIGHTEEN YEARS

Indian Woman, Abandoned on Desert Island, Finally Found by Party of Otter Hunters.

On San Nicholas island, which is uninhabited, a party of sea-otter hunters, landing to chance their luck, found, to their amazement, the imprint of human feet on the sandy shore—imprints freshly made. They scattered in search. But, the wind shifting and commencing to blow hard, they had to regain their vessel before the maker of the marks could be found. It was undeniable, however, a human being lived on this bleak, wind-blown island of sand and tall brushwood.

On returning to the mainland they reported the strange discovery, but nothing was done until a Roman Catholic priest was so moved by the news that he persuaded the captain of a small schooner to sail with him for San Nicolas. After two days' search-

small schooner to sail with him to San Nicolas. After two days' searching he discovered this lonely Crusoe—the first of a new kind. For he found inside a low hut of driftwood a woman more like a beast than a person.

She was clad in otter skins, and the feathered skins of the sea-fowl, and her companion was an otter, which she had caught very young and tamed.

The priest with difficulty got her story, for she had almost forgotten how to speak. Many years previously the small tribe of Indians to which she belonged—inhabitants of San Nicolas from time past—had been shifted by the government to the mainland. As they were being taken on board, her baby had fallen into the sea, and she had leaped after him, and in the dusk had been given up as drowned. She reached the shore, however, to find the child was dead. In utter loneliness she had lived there for 18 years.
