

The Daily Herald.

PUBLISHED BY
J.B. MORRIS & W.H. BREWSTER,
At No. 42 State Street Newburyport.

TERMS.
DAILY HERALD \$4.00 per annum.
Semi-Weekly Herald \$3.50 per annum.

At these rates payments are required to be made semi-annually. When not paid on presentation of the bill or until after the expiration of the year, \$5 will be charged for the Daily, and \$4 for the Semi-Weekly paper.
Advertisements not exceeding six lines, are inserted for 72 cents every line and upwards, \$1.00 per square; \$1.50 per square for longer advertisements. All advertisements for the benefit of others, as well as Legal Notices and those not confined to their immediate business at the time of contracting, must be paid for at the usual rates.

[From the New York Journal of Commerce.]

AMERICAN GRAPES. The grape-growers of the Ohio Valley are now in the midst of their harvest, and the vintage will be the most productive ever had. The grapes are remarkably well ripened, full of juice and saccharine matter. Not more than one-third of the crop has yet been gathered.

The Ohio river is termed the "Rhine of America," and has gained this appellation through the instrumentality of Mr. Nicholas Longworth, the pioneer in this branch of horticulture in the United States. He has now 150 acres of vineyard under cultivation, and owns three wine cellars, where wines are stored for fermentation and prepared for market, one of which contains 140,000 bottles. Mr. L. is 70 years of age, but is as vigorous, and performs as much labor, as many in the prime of manhood. He has accumulated an immense property, his taxes the last year having amounted to \$17,000, and which are said to be larger than are assessed upon any other man in the country. William B. Astor, and perhaps one or two others, excepted. For thirty years he has been experimenting with foreign grapes, with a view to their acclimation in the United States. Six thousand vines of the best Madeira wine grapes, and seven thousand from the mountains of Java, in France, besides others from the vicinity of Paris and Bordeaux, were procured, but which were all thrown away, after a protracted trial, being found inferior to the Catawba, a native of North Carolina. Near 200 varieties of grape have been tested, but the two best are found to be the Catawba and the Herbermond, which makes a wine similar to the Spanish Manzanilla, and which is to be more extensively cultivated than heretofore.

The vineyards are generally located on the slopes of the Ohio river; and nine-tenths of them are tilled by German vine-dressers, who have devoted their lives to the business. It has been customary to give a piece of land, say fifteen or twenty acres, with a house on it, to these Germans on the condition that they should plant a certain quantity of grapes each year, in a proper manner, and pay the proprietor one-half the proceeds of the vineyard.

In Ohio, there are 1500 acres of land exclusively devoted to grape-growing, between 300 and 400 of which are near Cincinnati. Within twenty miles of this city, including a part of Kentucky, on the opposite side of the river, there are 1300 acres, and double the quantity of vines. More have been planted this year than there were last. In Missouri, near Hermann, there are 500 acres; in Indiana 200 or 300; in Illinois about 100, and in Kentucky the same—making about 2500 acres in all. It is estimated that Indiana, Ohio and Kentucky, will this year produce at least half a million gallons of wine. The yield on some of the vineyards will be equal to 700 or 800 gallons—allowing 2,400 vines to the acre, planted about three feet apart, in rows separated by a distance of three feet. Mr. Robert Buchanan, who is among the most successful cultivators of the vine, this year obtains about 800 gallons of wine from each acre of his vine yard, which will net him about \$700 per acre. Some other vineyards will do equally well. Persons, however, are not advised to embark in grape-growing, with the expectation of profit, if it shall be necessary to hire labor. The German vine-dressers must all capable members of their families into the service—the wife often being the most efficient. In this manner, they realize an adequate income. The fruit is purchased from the vineyard men for from \$5 to \$6 per 100 pounds (or two bushels)—a bushel yielding from 35 to 40 gallons of wine. It is then mashed by the manufacturers in the city, and pressed. The juice is then fermented in the cellars, and the sparkling Catawba is in prime order for market at the end of about ten or twenty months. Mr. Longworth has three huge subterranean vaults, one of which will turn out 50,000 bottles every year, and another 100,000 bottles. A third cellar is capable of turning out 100,000 bottles yearly of dry wine. Some portion of the cellars is occupied by immense butts, or cylindrical tanks, one of which holds 5000 gallons, or \$5000 worth of wine, if bottled. The staves are about three inches in thickness, and the heads curve inward, so as to introduce the arch, to resist the internal pressure. Other objects, quite as noticeable, are the long rows of black bottles placed in a horizontal position, and stacked up like cord wood in solid piles, as high as one's neck. In the cellars of the extensive native wine establishment of Longworth & Zimmerman, are 24 casks holding about 2500 gallons each of 1850, '51, '52, and it is expected to store 25,000 gallons of this year's wine.

The American wines are of two general varieties, the "still" and the "sparkling." The first is wine that undergoes vinous fermentation, or the process which transforms the sugar of the grape into alcohol. To produce a sparkling wine, a second fermentation is excited, by adding a little "rock" candy, and the alcohol is transformed into carbonic acid gas. This Western wine, aside from being an article of domestic production, and entitled to public favor on that account, can be relied on as the pure and unadulterated juice of the grape, and the substitution of it for the dragged liquors of foreign importation is a most important and desirable object to be gained. Even where the manufacture of pure wines is attempted in the hot countries of Europe, it is necessary to mix brandies with them to make them keep, which is not done in saccharine matter. Americans, do not yet appear to properly appreciate the value of pure wines, because they so rarely find their way across the Atlantic. In the wine districts of Europe, brutal intoxication is comparatively unknown, or any of the effects resulting from immoderate drinking. Mr. Longworth recommends to us that a drunken vine-dresser is never seen. The demand for American wine has, of late years, increased, and now exceeds the means of supply. There is at present a market for wines of this description to the value of \$1,000,000 annually.

The manner of cultivating the vine in the valley of the Ohio, is a matter in which many will feel an interest, in all parts of the country. A hill with a crest, in exposure and a dry calcareous soil, with a southern exposure, is preferred. Wet or springy land is avoided. The cuttings should contain at least four joints, and be taken from wood well ripened; should be set out in a slanting position, with the top eye even with the surface of the ground, though covered with half an inch of light mould, if the weather is dry. Pruning is done from November to March, and cuttings are preserved in cool cellars until the ground is warm and dry, or mellow. The first season's superfluous shoots are pulled off, leaving but one or two to grow, and but one, eventually. In the spring the vine is cut down to a single eye, and one stalk or cane allowed to grow, tied to a stake, no suckers being allowed to grow. The second spring after planting, cut down to two or three eyes, or joints and the third year to four or five, pinching of laterals and tying up. This year, two stalks are trained to the stake, and some grapes will be produced. The vine is now established. The fourth year, pruning requires good judgment. The best shoot of the former year is cut down to six or eight joints, and fastened to the adjoining stake in a horizontal position, or bent over in the form of a bow, and tied to its own stake. The other stalk is cut down to two or three eyes, to make bearing wood for the next season. Mr. Buchanan favors the bow system. The time recommended for tying the vines, is when the buds begin to swell and look white.

The cultivation of the grape has been carried to a high degree of perfection in the Ohio valley.

From the Portland Advertiser.

PORTLAND AS A MOLASSES MARKET.—In all the sugar-producing countries, molasses, which is the mere drainage of sugar, has but little value compared with the sugar itself, and in some instances, where the cost of transportation is very high, and the price low at the shipping ports, it has been permitted to run to waste. In England, and on the continent of Europe, the quantity consumed, except for refining, is very small compared with the United States. The longer voyage to Europe makes the loss by leakage very great; and its bulk as compared with its limited value, has undoubtedly prevented its use there so generally as with the inhabitants on our continent. The molasses trade has long been a leading branch of the West India business in Maine. The vessels that carry our lumber are better adapted for its safe transportation than larger vessels, and from the earliest days of our trade to the West Indies, it has been the leading article for the return cargoes of our West Indian. One of our former merchants has informed us that during the revolutionary war his vessels often obtained a hoghead of molasses in exchange for one thousand of Sperrying shingles; molasses then being worth from 60 to 70 cents per gallon in the United States.

British writers say that the foundation of Yarmouth (England) was laid on herring. We may well say that the foundation of Portland is molasses; for it has not only given competence and wealth to many who have engaged in it, but it has afforded employment for a numerous population, who have been engaged in the various branches of labor and mechanical skill connected with it.

In addition to the consumption of molasses for culinary purposes, there has been, and still is, a large demand for the same for distilling purposes. This demand has, however, in Portland, been gradually diminishing, until now we have no distillery in Portland, or in Maine. Hence our importers have had to find a market for the more ordinary qualities suitable only for distillation, in Boston.

Within a year or two, however, a new demand has arisen for molasses, and for refining, or more properly speaking, for boiling; that is by heating the molasses by the aid of steam, sufficiently to granulate those saccharine particles that were not sufficiently boiled to produce that effect in the West Indies, a common brown sugar is obtained, known in Europe as bastard sugar. Establishments of this kind were first introduced in the United States into Philadelphia, and are now to be found also in New York and Portland, and the consumption of that in our own city, when in full operation, being about 140 hds of molasses per day. Although sweet molasses is preferred for boiling, yet sugar is made from that also.

Heretofore the proprietors of the various Distilleries in Boston have been able to control the markets of all New England, especially for tart molasses; but we think the new elements that have lately entered into this business here will not permit them to do so longer, and that Portland has now attained a position in this business where she can dissolve the mercantile connection that has bonded the West India trade of Maine to Boston; as our people thirty years since dissolved the civil connection with old Massachusetts.

The importation of molasses into Portland for the year 1850 was 104 cargoes of 35,788 hds., and 1665 tierces; for the year 1852 it was 159 cargoes of 51,292 hds. and 3320 tierces. Our Foreign imports now exceed those of Boston.

When the molasses trade fairly opened this season, the distillers of Boston held back in their purchases, and resolved among themselves that they would put the price of molasses down to about fifteen cents per gallon. Under this influence the Boston market that opened at upwards of 40 cents, declined to 16 cents, at which price speculators, not in the distilling interest, made purchases. Knowing that the importations then made and the way to Portland was very large, the Boston distillers supposed that our importers would have to find a sale for their molasses in Boston, or as one of them remarked to a Portland merchant "you have got the molasses at Portland, and must sell it."

Fortunately, however, the importers of Portland were not quite so short as the Boston gentlemen supposed, and in place of selling at 15 cents, they became purchasers in the Boston market, and send their orders up to pay at 16 and 17 cents, at the same time withdrawing their molasses here from market.

Thus the matter has stood for some time until the distillers finding that they were mistaken in their expectations, have come into market and purchased at 25 and 26 cents, instead of 15 cents.

We allude above to the new elements that have lately entered into the molasses trade in Portland, and noted one of them, namely, the amount consumed by the Portland Sugar House, which is more than all the consumption by the distilleries of Boston at this time. The other new elements are the increased consumption in the interior of Maine, arising from the greater facilities for the transportation of so heavy an article of merchandise by our railroads, and also the new demand for the Canada market, to which it is now sent at a profit even at the present advanced prices.

We have given these facts not by the way of vain boasting, but as simple mercantile information which interests all concerned in the molasses trade, whether at Portland or Boston, or the West Indies; and they go to show that Portland in the molasses trade at least, has become the chief molasses mart of New England.

Coal Hods,

COAL Stoves and Shovels for sale at No. 6 Market square, by 012 D. T. WOODWELL & CO.

Newburyport Railroad.

FALL ARRANGEMENT.

DEPOT, WEST OF THE TUNNEL, WHERE ALL TRAINS WILL LEAVE AND ARRIVE.

ON and after Monday, October 31, 1853, cars will leave as follows—
Leave Newburyport for Bradford, at 7 and 11:20 A.M. and 4:35 P.M.

Byfield for Bradford—7:12, 11:32 A.M., 4:47 P.M.
Georgetown for Bradford—7:13, 11:33 A.M., 4:53 P.M.
Greveland for Bradford—7:24, 11:44 A.M., and 5 P.M.
Arriving in Bradford at 7:35 and 11:55 A.M. and 5:12 P.M.

Portsmouth at 7 A.M., 2:3, 5 P.M.
Portland at 7 A.M., 2:3 P.M.

JOHN KINSMAN, Sup't.

MEDICAL CARD—To the Afflicted

Dr. Ingalls' Medical & Surgical Office.

No 55 Middle street, Newburyport.
WHERE he will attend to the various ills flesh is heir to, particularly diseases that have baffled the skill of our most eminent medical men, and those that have no more than common practical experience in such cases. Remember the services of one of the most thorough and scientific Physicians, is now offered to the public, ready and willing at all times to administer the most mild and efficacious Medicines that can be procured, and will guarantee a cure in the most obstinate cases. Ten years' practical experience in the business gives him that advantage seldom obtained by others.

His superior remedies are based on the most scientific principles. The Dr. will devote his strict attention to the cure of all Chronic and recent complaints as Tumors and all Impurities of the Blood, Scrofula, Salt Rheum, Erysipelas and all Cutaneous Eruptions, Liver Complaints, Rheumatism, Swelled Joint and Limb, Tiedouleurax, Nervous Headache, Ulceration of the Throat and Nose, Piles, Deafness, Hydrocele, Prolapsus Uteri, Flour Aloes, Syphilis or Venereal Diseases, Gonorrhea, Gleet, Stricture, Paraphimosis, and every disease of the Urinary or Genital Organs.

SEMI-NAL WEAKNESS.—Consultations always private and strictly confidential. No one seen in the office but the Dr. A cure warranted in any private complaints in from 3 to 5 days.

A CARD TO FEMALES.—Dr. Ingalls' highly celebrated monthly Drops and Pills, which have gained the superiority over all others now in use for the cure of suppressions, irregularities, &c., being certain in their effects, whether produced by colds or any difficult cause, always removing every obstruction—no female should be without them, as there is no time will prevent long and dangerous sickness. Board for patients, with kind and efficient nurses for those who desire. Dr. Ingalls will give the best medical and surgical treatment that can be obtained in the New England States. His extensive practice gives a benefit to the patient seldom obtained.

N.B.—Ladies who wish, can obtain the medicines of Mrs. Ingalls, at the Office, with perfect confidence in every case. His medicines are free from mercurial and nauseous drugs. All those afflicted with any of the above complaints, or any other of a similar form by calling upon Dr. Ingalls, will be cured in a shorter time than could be attained elsewhere. All those living at a distance out of town can communicate by letter, stating their complaints or symptoms as accurately as possible, and will be attended to and answered by the return of mail. All letters must be post paid to ensure attention, with one dollar enclosed as remittance fee. Owing to the success that attends Dr. Ingalls' practice merits of his medical skill are daily adding evidence to his fame, flowing in from all parts of the country, testifying to the wonderful and beneficial effects of his medicines. The Dr. is pleased to see the public discriminate the skill of one so successful, and hopes, by a continuance of his endeavors, to deserve a succession of the same.

Dr. Ingalls' Office, No 55 Middle street, a few doors from Federal street Newburyport. ap7

FOR LIEUT. GOVERNOR.
WILLIAM C. PLUNKETT,
OF ADAMS.

[Correspondence of the Herald.]
SANTA BARBARA, CAL. Sept. 11, 1853.

I am now busy here in practicing law; next week I intend to visit some copper mines which have been discovered in this country, they are situated about 90 miles from here, in the Sierra Nevada range. Several distinct veins have been traced on the surface of the ground for the distance of 100 to 150 feet, and of the breadth of from 7 to 16 feet. The ore, red oxide and green carbonate, is very rich and is thought to be worth \$200 per ton, it contains some gold and a little silver; the district of country in which the three veins have been discovered is represented as maintaining the same general characteristics for many miles around. As I have never been into the interior of the State at all, I have thought that I could spend a fortnight at these mines and their neighborhood, quite pleasantly and perhaps profitably.

We have now in Santa Barbara a great curiosity, it is an Indian woman who has lived for eighteen years alone upon the island of San Nicholas—a small island about forty-five miles from this place, during which time she has not seen the face of a human being. This island was once peopled by a tribe of Indians, to whom the North West tribes were hostile. To preserve the remnant of this tribe from destruction as well as with a view to christianize them, the Padres induced them to come to the main land eighteen years ago. After they were all on board the vessel sent for them, this woman swam ashore to look for her child which had been left; and a storm springing up in the night, the vessel was compelled to put to sea, on returning, she could not be found. She was known to be alive by those who at times visited the island for the purpose of hunting otters, from the marks of fires and from foot prints in the sand. On being approached the other day she manifested much joy which she betrayed by signs of the most significant character, and at once commenced packing up her few articles of furniture. Whether the sounds which she utters are words or not, has not yet been ascertained. The man who found her is familiar with five or six Indian languages, but he was unable to understand a single expression; it is more than probable that she has forgotten her native tongue entirely. Her clothing consisted of skins of birds, sewed together with the fibres of some tree or plant. Her food has been shell fish, seals, and a small bulbous root, similar in appearance to an onion, but wholly tasteless. The needles with which she stitches her garments are made of the sharp bones of a fish. She had two hooks made of a bent nail and sharpened by friction upon a stone. Her lines were beautifully twisted from the sinews of some animal, probably a species of fox which abounds on the island.

Her age, as near as can be estimated, is about 55 or 60. Her features are quite masculine, and her hair of the color of dark brown, and very fine. This is quite remarkable for an Indian; their hair you know, is always jet black and coarse. In some future letter I will give you a more extended account of this marvel of the 19th century. She is truly an object for the reflection of the philosopher and the inspection of the curious.

Yours &c. C.

DISTRIBUTION OF COTTONS. The New-York Journal of Commerce publishes the following table, furnished by a correspondent, showing the distribution of the Cotton supply for the last ten years, expressed by the per centage.

Year.	Crop.	Great Britain.	France.	N. of Europe.	Other Foreign.	United States.	Burr's.
1843-4	354,000	51.78	12.72	5.10	5.77	20.59	4.94
1844-5	314,000	52.03	13.40	5.27	12.12	18.18	5.12
1845-6	282,000	56.13	11.94	5.13	5.33	16.02	3.25
1846-7	251,400	49.16	12.85	5.30	5.40	21.65	7.72
1847-8	200,000	53.03	12.70	5.71	5.59	17.56	3.31
1848-9	228,000	51.08	10.89	4.79	5.35	20.75	6.72
1849-50	185,700	44.06	12.81	4.01	4.94	22.60	11.49
1850-1	194,600	53.30	12.59	3.55	5.38	19.36	4.79
1851-2	254,000	56.34	12.06	4.36	5.39	15.36	3.33
1852-3	212,500	55.50	13.30	3.25	3.54	16.32	7.90
Average per year.	22,900	51.11	13.11	5.57	5.30	18.95	5.87

The total supply figures show the crop of each season, including stock brought over. 1847, that year of European famine, stands out in bold relief, showing the decided effect of high bread prices upon cotton consumption. In it, crop of 1846-47, England suffering under famine, took 6 per cent. less of the supply, viz: 1,885,773 bales, than it had taken the year before, as follows: 2,144,663 bales. France nearly 2 per cent. less; other countries, especially the United States, profiting by the high prices of breadstuffs, took a larger proportion than usual, consuming equal to half of the quantity taken by Great Britain, yet leaving 11 1/2 per cent. of supply as stock on hand. 1848, the year of continental revolutions, favored England's manufacturing interest. It took 51.5 per cent. of a supply of 2,562,471 bales; France, the chief seat of disturbances, taking but 10.7 per cent. less than it took of any crop. We are entering upon a new season, with by no means low prices for cotton, with an advancing grain market in Europe and unsettled state of politics threatening war over the European continent, besides an increasing stringency in the leading money markets.

The 24th annual meeting of the Essex County Teachers Association, will be held at the Free Church in Andover, on Friday and Saturday 21st and 22d Oct. The lectures on Friday, will be by Rev. Mr. Cowles, of Ipswich; Rev. Dr. Withington of Newbury; Professor Crosby, of Newburyport, and Professor E. B. Barrows of Andover.

On Saturday, a lecture by B. F. Tweed, Esq., of South Reading; and the lectures and topics of general interest will be discussed.

[Reported for the Herald.]

POLICE COURT—Before Judge MARSTON.
WEDNESDAY, OCT. 19.

Either robbery has been on the decrease within the past week, or the officers have been less vigilant—There have been no arrests for three or four days, and had it not been for the civil business, the court would have enjoyed quite a vacation. This morning affairs began to assume a different character.

William Doyle, was complained of by Mr Edwin Currier, of the firm of Currier & Hurley, clothing merchants, for obtaining goods under false pretences. It appeared from the evidence that Doyle selected from the complainant's stock, a coat, vest and pants, to the value of nearly twenty dollars, and asked the privilege of taking them home, to show his wife promising to return them immediately. The promise was not kept, and Mr C started in pursuit of him. He finally was found with the clothes on, marching off in fine style. To Mr C's interrogatories he replied that he had got the suit, and he had— if he would pay for it. He confessed to taking the clothes, in court, but said he calculated to pay for them. Bound over in the sum of \$200 to appear before the next C. C. P. the case being without the jurisdiction of the court.

Martin McDonnell was charged with being a common drunkard, but not a word of evidence could be brought out to sustain the charge. For some cause or other the main witness failed to appear. He was discharged.

Charles Bamford, a young lad was complained of by Mr Joshua Tappan for throwing an apple at him while passing by the School street School house. It was just before the school hour, and some forty or fifty boys were about the yard, four of whom testified that they did not see the apple thrown. Mr T, said he saw the boy throw the apple and the evidence was not positively contradicted. Fine \$1.00 and costs.

Thomas Powers pulled a boy's ears last evening so severely, that blood was brought, and the father to day enters a complaint for assault. Mr P. says that the lad threw rocks against his building; but no evidence appearing that the owner of the ears was the transgressor, he was fined two dollars and costs. J. N. Pike, Esq. for defence.

CRIMINAL MATTERS.—The trial of Jasper R. Robinson, John Williams, and Wm. Smith, is going on at Worcester, for burglary, and George Gardner and Pliny H. Babbitt, the latter a deputy sheriff of Worcester county, are on trial for aiding, hiring and abetting the burglars in their nefarious crimes.

Justus Squire, the notorious railroad thief, who was in the habit of getting upon the merchandise trains on the northern railroad lines, in the night, and throwing and rolling off articles, and who is in jail at Concord, N. H., attempted to commit suicide in his cell on Sunday. He had taken a strap used for folding up his bunk, and had placed it about his neck and hitched it to a spike in his cell, from which he was found suspended. He was discovered by the chaplain before life was quite extinct, and was taken down and restored to consciousness. He attempted suicide a few weeks since while in jail.

In the Supreme Court at Alfred, Me, on Friday, Wm. E. Haskell, convicted of store breaking, on being called upon, before receiving sentence, to know what he had to say, made some hypocritical remarks calculated to propitiate the Judge, and received sentences of two years in the State Prison on each indictment. County Attorney Drew observed that the prisoner was a dangerous man, and should have had a more severe sentence, and Haskell replied in some personal remarks. When the officers went to take Haskell out of Court to jail, he resisted, and fought like a madman. For this freak the Judge reconsidered one of his sentences, and sent him to Thomaston for seven years instead of four.

WE regret to learn that Nathan J. Lord, Esq. of Salem, was seized with an apoplectic fit, yesterday. He was standing on the sidewalk, talking with a person, and fell in a moment back wards.

LAUNCH. The ship "VOLANT," of 900 tons, will be launched from the yard of John Currier, Jr, this day at 1 o'clock, P. M. She is owned by Capt Micajah Lunt and the builder.

MURDEROUS ASSAULT AND ROBBERY UPON THE COMMON. At about one o'clock Tuesday morning, opposite the Winthrop House, at the corner of Tremont and Boylston streets, a man covered with blood, was found upon the sidewalk. He stated that his name was John Swift, and while passing over the Common, being in the valley south of the large hill, he was attacked, knocked down, beat until senseless and robbed of nine dollars. He was taken to the Watch-house, and sent for, who found his head to be in a terrible condition, with several wounds in various places, both before and behind, and that his life was in danger. He was then sent to the Hospital.

At about eight o'clock this morning, a police officer found upon the Common one of the heavy stakes with signs attached of "Walk on the Paths," which had been pulled up and was lying about ten feet distant, the top and half way down being covered with blood, and there was also a lock of hair attached, which the wounds to Swift were given by the ruffians who attacked and robbed him. Near the stake was a large spot of blood which had soaked the ground to some depth. The probability is, that after Swift came to, he crawled to the place where he was found. [Boston Journal.]

MIDNIGHT WEDDING. Quite a romantic affair occurred last week in this city, after the following manner:—A young and talented Episcopal clergyman of Montreal was waiting in this city for the arrival of his betrothed from England in the steamer Niagara, and had made arrangements to have the matrimonial knot untied with delay. The steamer did not come up until eleven o'clock in the evening, and the lovers, who had not seen each other for three years, repaired to the Church of the Advent, in Green street, as soon as practicable. The Sexton lighted a couple of tapers, the Bishop dressed in his canonicals came in, and the ceremony was performed in the presence of the Sexton and the Superintendent of the Revere House, who gave away the bride. The train were made one flesh just as the clock struck twelve. It was an impressive scene, the dimly lighted church, the trusting bride who had a few minutes before arrived alone in a cumbrous vessel, was to be placed here under the protection of her only friend on this side of the Atlantic. [Boston Herald.]

ESSEX COUNTY WHIG CONVENTION. The delegates of the Whigs of Essex County assembled in Convention Tuesday morning, at the Town Hall, Salem, for the choice of Senatorial candidates.

The Convention was called to order by C S Foote, Esq. of Salem, Chairman of the County Committee, and temporarily organized by the choice of John W Low, of Gloucester, Chairman, and Nehemiah Brown Jr. of Salem, Secretary.

A Committee on permanent organization was appointed by the Chair, consisting of five members, Mr Newhall, of Lawrence, Chairman, who subsequently reported the following list of officers, which was unanimously adopted:

President.—Hon DAVID CHOATE, of ESSEX.
Vice Presidents.—B H Corlies, of Gloucester, John Davis, of Methuen, George W Keene, of Lynn, Jabez L Pearson, of Newburyport, Wm B Brown of Marblehead, J Page, of Salem, T J Clark, of Salisbury, and Mr Pecker, of Haverhill.

Secretaries.—N Brown, Jr, of Salem, and N D Blanchard, of Lawrence.

Mr CHOATE declined serving as President, on account of feeble health, when Hon CHAS W UPHAM, of Salem, was chosen in his place.

In taking the Chair, Mr UPHAM briefly addressed the Convention, expressing the almost certain belief that Essex county would send the bible held out in the new Constitution, and that the would place five Whigs in the State Senate. The Whig spirit spreading throughout the county, would eventuate in placing in the Presidential Chair a Union and a Massachusetts Whig. [Cheers.]

A Committee on Credentials was appointed, who reported 121 delegates present, representing twenty-four towns.

On motion, the members of the Whig County and State Committees were invited to consider themselves members of the Convention.

Letters were read from Hon Micajah Lunt, of Newburyport, and Hon Alfred A Abbott, of Danvers, declining a re-nomination. Hon Henry S Russell, of Salem, and Hon N S Howe, of Haverhill, were also announced as having declined.

On motion of Mr Law, of Gloucester, a nominating list was opened on the Secretary's table, on which was placed the names of 22 candidates, by nomination at large.

Considerable discussion took place in regard to the most convenient and that method of voting for candidates. It was finally decided that the several delegates should be called upon, by towns, to mark the five names on the list they might individually prefer. The result of the marking was announced as follows:

Whole number of votes	102
Necessary to a choice	52
Thomas Wright, of Lawrence, had	62
Isaac H. Boardman, of Newburyport,	56
Henry G. Gray, of Marblehead,	53
James Haskell, of Rockport,	51
Thomas P. Pingree, of Salem,	51
George Cogswell, of Bradford,	48
Amos B. Topley, of Lynn,	31
Joseph W. Carleton, of Methuen,	25
Patron Sargent, of Amesbury,	24
Moses Black Jr, of Danvers	23
Wm. D. Pickman, of Salem,	21
Wm. N. Cleveland, of Topsfield,	13
Enoch Wood, of Boxford,	12
Augustus Story, of Salem,	15
Andrew Dodge, of Wenham,	10
David Choate, of Essex,	6
Edward S. Davis, of Lynn,	5
Seah Clark, of Salisbury,	4
George Wilson, of Marblehead,	4
E. W. Choate, of Beverly,	3

On motion, Messrs Thomas Wright, of Lawrence; Isaac H. Boardman, of Newburyport; Henry G. Gray, of Marblehead; James Haskell, of Rockport; and Thomas P. Pingree, of Salem, were declared the nominees of the Convention for State Senators from Essex county.

Mr Endicott, of Salem, from the Committee on Resolutions, reported a series, which were unanimously adopted as the voice of the Whigs of Essex.

On motion, a committee of five was appointed, Mr Foote, of Salem, chairman, who reported the following gentlemen to act as a County Committee for the ensuing year: Messrs Wm. E. Endicott, of Salem; Benjamin H. Corlies, of Gloucester; Edw'd Little, Jr, of West Newbury; James H. Carlton, of Haverhill; Eben Blatchford, of Rockport; Nathaniel G. White, of Lawrence, and Ralph C. Huse, of Newburyport.

On motion, the invitation of the Whigs of Salem to Hon. Edward Everett was adopted by the Convention, and that gentleman was invited to address the Whigs of Essex in the city of Salem.

A committee of five was appointed to circulate certain articles published in the Salem papers, in relation to the new Constitution.

A vote of thanks was returned to the officers, and at 14 o'clock—after a few encouraging remarks from the President—the Convention dissolved. [Boston Atlas.]

MORE POLITICAL LETTERS BY GOVERNMENT OFFICERS. The New York papers contain Mr. Bronson's reply to Secretary Guthrie, and a long letter from Attorney General Charles O'Connor in reply to the Washington Union.

The following are the closing paragraphs of Mr. Bronson's letter:

"This is, I believe the first instance in which a member of the Cabinet has interfered with the discretion of a Collector, Marshal, Postmaster, or any other Government officer having patronage to bestow, and laid down a rule for his government in the selection of his deputies, clerks, or other agents, and it is certainly the first instance in which a public officer has been instructed to go into an inquiry about sections, and see that a just distribution of offices was made between them."

"You have a right by law to give instructions on many subjects connected with the collection of the revenue; and such instructions it will be my duty to follow; but when you go beyond that and undertake to direct matters in which the law has confided to my discretion, no one is obligated to obey. As to the officers of the Customs, the Collector has the right of nomination, and the Secretary the right of approval or rejection; and as to the other officers, the power of appointment is vested in the Collector alone."

"I shall not interfere with the exercise of your powers, and I trust you will render the like justice to me. If you or any other high officer of the government, desired the appointment of a particular individual, I need not say it would give me great pleasure to comply with his wishes; but I respectfully deny that you have any right to give instructions for the government to conduct in making selections for office. So far as relates to the mere dispensation of patronage, without regard to my responsibility for the acts of the parties appointed, I would gladly transfer the trust to another. I have no taste for such matters, and my comfort (aspirations I have none) would be greatly promoted if some one else would perform the service for me; but the law and my commission have cast the burden upon me, and I cannot surrender it to another without a dereliction of duty."

A GREAT WHEAT CROP. The Le Roy N. Y. Democrat says that Hon. A S Upham, of that village, from a field of 100 acres, has raised and gathered in good order, three thousand six hundred bushels of wheat, the present season.

FIRE. The valuable steam mill in the shipyards of Messrs Pimmons & Littlefield, directly opposite Kennebunkport, was found to be completely in flames, about 8 o'clock, on Monday evening, and was so far gone on the inside as to be impossible even to save any portion of the many chests of tools in the building, belonging to the workmen on the adjoining vessels. In addition to the intrinsic value of this establishment, is the loss in time to Messrs. Emmons & Littlefield, who have two ships on the stocks, in need of their daily operation. The ship which is building for Capt Sylvester Brown and others, a few rods north of the mills, was for some time on fire, but was saved by the great exertions of Arundel and Niagara engine companies, in the river, and a line of buckets over the boardwalk. The injury to the ship is very trifling, but the blackened timbers and burnt walls show how very narrowly she escaped. The great wind most of the time blew across the river, and several buildings in the village were ignited by burning cinders.

COST OF A LOCOMOTIVE. Our first class narrow gauge engine, weighing empty 44,000 lbs., and are worth 16 cents per pound. They will consume one cord of wood and 1200 gallons of water per hour, and will generate 285,000 cubic feet of steam per hour, at a pressure equal to that of the atmosphere. The heating surface is of the extent of the bottom of a boiler, 24 feet in diameter. The strain upon the iron of the shell of a boiler, is from 6500 to 11,000 lbs. per square inch under ordinary pressures. There is also an additional strain of about 4000 lbs. per square inch exerted lengthwise of the boiler to pull it apart crosswise. The whole pressure exerted against the internal surfaces of the boiler amount to 30 millions of pounds, or 10,000 tons! The usual distance travelled by the locomotive, being in motion but one-eighth of the time, is equal to once around the globe every year. In going sixty miles an hour, 88 feet are traversed per second; 3 revolutions of the driving wheels are made, requiring strokes of the piston, and 20 intermediate periods of action in the valve, equal to the division of a second into 40 parts.

FROM NEW MEXICO AND THE PLAINS.—A DEEPERATE BATTLE WITH THE INDIANS. Louisville, Oct. 13. Letters from Santa Fe state that Col. Aubrey, in his recent journey over the Plains found gold at the crossings of the Colorado, and in other places, and silver and copper ore in great abundance. The Indians on the route were very numerous and hostile, and had fought Col. Aubrey's party for thirty days. Nearly all of the latter were wounded, Col A. having received eight wounds, at different times.—The fighting was chiefly with the Gatozes. A tribe of Indians was West of the Seine, who had gold bullets for their rifles.

LEWISBURG, Pa. Oct. 18. The steam saw mill and boat yard of Frick, Sliper & Co, were burnt on Saturday night, together with the draw bridge, the new bridge over Buffalo Creek, three or four new canal boats, and a large quantity of stock. Loss between 20,000 and \$30,000. The editor of the Millionian, and fireman, were badly injured—so much so that their recovery is doubtful.

HARVARD UNIVERSITY. A Catalogue of the Officers and Students of the University for the academic year 1853-54, first term, has just been published, by which it appears that there are—Divinity Students 26, Law Students 142, Scientific Students 69, Medical Students 119, Resident Graduates 75; Under-Graduates, viz: Seniors 88, Juniors 78, Sophomores 93, Freshmen 70.—Total 700.

It is stated that Messrs A. T. Stewart & Co., the celebrated dry goods firm of New-York, have purchased the Metropolitan Hotel, for the round sum of \$600,000, and that they are to pay down in cash \$400,000, leaving \$200,000 on time.

LOWELL LOCOMOTIVES. Four locomotives were on Friday turned out from the Locomotive Shop, in Lowell. Two were for the Rutland and Burlington road, and two were for the Mad River and Lake Erie road. For speed, strength and beauty, these engines are inferior to none.

MURDEROUS AFFRAY. Monday afternoon, about 4 o'clock, three men entered Souther's machine shop, South Boston, and commenced talking with some of the hands, when a dispute arose between the visitors and workmen; blows were the result, and in the melee, one of the visitors, named William Robertson, had his face badly mangled, his left eye entirely destroyed, and the back of his skull badly injured.

MILITARY. The Pulaski Guards, with the citizen of South Boston, are making most extensive arrangements for giving Maj. Ben. Perley Moore's Battalion of Riflemen, a most magnificent reception. The 1000 men will be escorted to the bridge at 5 o'clock this afternoon by the Columbian Artillery, Capt. Cass, where they will be received by a committee of the Pulaski Guards. After partaking of supper at the Armory of the Guards, an hour or two will be spent in recreation.

Later in the evening a grand military and civic reception will be given. Three large Halls have been engaged for the occasion, and it is expected that some seven hundred gentlemen and ladies will participate. A magnificent supper will be given in Terpsichore Hall, while Lyceum and Odd Fellows' Halls, will be devoted to promenades &c. Two tail bands have been engaged for the occasion.

On Wednesday morning, the Guards, with their visitors will visit Dorchester Heights, Bunker Hill Monument and other places of interest, and at 10 o'clock they will visit City Hall. At 11 o'clock the whole military troupe will partake of a dinner provided by James & Valentine of Spring Lane, and in the afternoon the visitors will return home. [Boston Traveller of Tuesday.]

A few years since, as a wealthy Boston merchant was leaving a store in New York, where he had had occasion to transact some business, his eye was attracted by the appearance of a man who was removing some boxes from the store. In him he thought he recognized one whom he had seen before in a far different station. "Is not your name G—?" said he, "and were you not a year since at the head of a large and flourishing establishment in L—?" "Yes, sir," was the reply; "but I failed in business a few months, and was obliged to begin the world anew. Rather than call upon my friends, I wished only to get a foothold. Call twelve months hence, and inquire for me." Twelve months after that conversation the porter's name was inscribed as a member of the firm, and honor and respectability and wealth were soon associated with his name. [Boston Journal.]

The Washington Star says that a rumor prevails there, concerning the failure of a noted steamship operator in New York.

DEATHS.
In Haverhill, Mrs. Charlotte Batchelder, aged 69, — Mr. Joseph Chesley, of Londonderry, N. H. aged 25. — Abby K. only daughter of Mr. J. B. Swett, aged 7 years.

THREE DAYS LATER FROM EUROPE.

We received last evening, through the attention of Mr. Flinders, of the Boston Traveller, the third edition of that paper, containing three days later intelligence from Europe, brought by the steam ship Asia. It will be seen that the accounts of the declaration of war, are still of a contradictory character.

Cotton and Broadstuffs have both declined at Liverpool.

NEW YORK, Oct. 18.
The Steamship Asia, which left Liverpool on Saturday, Oct. 8, arrived this afternoon, at 3 o'clock. The Sultan has not signed the Declaration of War. The English and French Governments have notified Russia that it is too late to make any modifications, and that England and France will support the integrity of Turkey.

The Czar, at Olmutz, strongly advocated peace. The Banks of France have raised their discounts to four per cent; Prussia to five; Warsaw to six per cent.

Commander Ingfield has returned from the Arctic Sea. He brings no intelligence of Sir John Franklin.

LIVERPOOL, Oct. 8. Markets dull. Cotton, prices irregular; sales of the week 35,000 bales, closing quiet 1 1/4 lower.

Flour 6d lower. Wheat 1 to 2d lower. Corn 1d to 1 1/2 lower.

Manchester trade dull.

LATEST.—DECLARATION OF WAR CONFIRMED.—The Paris correspondent of the London Times of Friday evening, says the confirmation of the Declaration of War by Turkey has reached Paris.

The Paris correspondent of the London Post, on the same evening, says that the Porte has fixed four weeks as the further time in which the evacuation of the Principalities must take place.

LONDON, Saturday morning. The Cabinet had a long session yesterday.

Breadstuffs are falling in France.

[By Telegraph to the Boston Traveller.]

NEW YORK, Oct. 19.
AID TO TURKEY.—At a meeting of Exiles in this city, it was determined to form a volunteer legion, to be commanded by Major Turanowski, to proceed to Constantinople, in case of war, and offer its services to the Sultan.

FROM VENEZUELA. A letter from Porto Cabello of Sept. 21, says that the country is at present quiet and thoroughly under the sway of President Monagas. Many of the State prisoners have been placed at liberty, and others banished to distant provinces.

WASHINGTON, Oct. 19.
APPOINTMENT. Levi K. Bowen, of Baltimore co, Md., late editor of the Jacksonian, has been appointed Consul to Bordeaux.

NEW ORLEANS, Oct. 17.
The weather is fine; deaths during the week 137, including 36 of yellow fever.

Flour, has advanced 25c per bbl; large sales have been made at \$7 for superfine and \$7 25 for extra; gunny bags advanced to 14c.

The sales of Cotton for the last three days have barely reached 1600 bales. The market is completely unsettled to-day by the Atlantic's advices. The receipts are increasing and prices nominal.

Col. Schoeler, late of the Boston Atlas, has become the editor of the Chicago Tribune.

CAUTION. The Carriers of the Herald are not furnished with copies of the paper for sale, and persons who purchase of them encourage dishonesty and render themselves liable to prosecution. Those individuals who are in the habit of stealing papers from the doors of our subscribers need not be surprised if they find their names in the Police Report.

We have information in regard to some of both classes of offenders—who tamper with the carriers and the thieves—which may serve to put Justice on the track. Any person who will leave such information at the office as will expose these depredations, shall be rewarded for their trouble.

E. D. GREEN has removed his Printing Office to the rooms over Mr. James Caldwell's store, State street.

TRADE AND COMMERCE.

Boston, Oct. 19. Fish.—The demand for Codfish has been quite active. There have been considerable sales at \$22 1/2 a 3 3/4 per qt, for Grand Bank, comprising several lots in the outports; \$3 for Western Bank; and \$2 a 2 1/2 per qt, for small. Hake are selling at \$1 50 a 1 1/2 per qt. Haddock \$1 25 and but few in market. Mackerel are very firm at previous prices. The arrivals are light, and but few in market. Sales of large at \$16 for No 1; \$14 for No 2, and \$9 for No 3; and Shore at \$14 50 a 15 for No 3; \$12 for No 2, and \$8 for No 3. Some Nova Scotia No 1 have been sold at \$16 per bbl, duty paid, and No 3 at \$8 per bbl, in bond. A lot of 1800 qt French Grand Bank Codfish sold in bond at \$3 20 per qt, and 500 qt superior English Codfish at \$4 50 per qt, duty paid.

Freights.—There is a scarcity of large vessels, and freights in all directions continue to rule high. To California there is less offering, but the rates are steady. We quote 40c in fall, and 50c in clipper ships, for measurement goods. To Australia the rates range from \$2 a 50M for Lumber. Liverpool freight goods, and \$2 a 50M for Lumber. Liverpool freight goods are advanced. We quote 35 a 40c per ton for heavy goods, 4 a 5c per bbl for Flour, Naval Stores and Provisions; 10 a 12d for Grain, and 3-8 a 1-2d for Cotton. The barque Ansin has been chartered for London, for the round sum of \$4000, and is engaged nearly full; 4 a 5c per bbl for flour, Naval Stores and Provisions; 10 a 12d for Grain, and 3-8 a 1-2d for Cotton.

To Orleans and Mobile the rates are easier. We quote 8 a 10c per 100, 50 a 60c per bbl, and \$4 a 4 1/2 per ton. Coal freights have advanced, and now rule from Philadelphia at \$2 25 per ton. In Deal freights we notice the engagements of a large Kennebunk ship, to load at St. John for Liverpool, at £6 1s 3d, and £6 10s could now be obtained, but no vessels. An Eastern ship, now in New York, has been chartered by a house in this city at \$2 25 per ton a month, for the vessel alone; the barque Nevada, for Constantinople, for \$6500; a brig to Rio Janeiro at \$2500; Lumber engagements from Southern to Northern ports, at \$9 a 11 per M.

New York, Oct. 18. (6 P. M.) Cotton quiet at yesterday's prices, sales 8000 bales.

Flour lower, sales 18,000 bbls; com to straight State and Ohio, 68a68.1; Southern firm, sales 600 bbls; mixed to straight 67, 69a74.12.

Grain, wheat advanced and active, sales 154,800 bu; Genesee 1, 53a57; white Ohio 1, 43a48.1; white Southern 1, 49; white Michigan 1, 52a55.15. Corn, Eastern sales 24,800 bu; white 82a85; mixed 81a82.1; Southern and New Jersey yellow 83a85.

Provisions.—Pork lower, sales 300 bbls; Mow 16.94 a 17; Prime 13.50a13.62. Lard steady, sales 120 bbls at 11a12c.

Money Market.—Money is in active demand at 10a 15 per cent, for first class

[Correspondence of the Herald.]

SANTA BARBARA, CAL. Sept. 11, 1853.

I am now busy here in practising law; next week I intend to visit some copper mines which have been discovered in this county, they are situated about 90 miles from here, in the Sierra Nevada range. Several distinct veins have been traced on the surface of the ground for the distance of 100 to 150 feet, and of the breadth of from 7 to 16 feet. The ore, red oxide and green carbonate, is very rich and is thought to be worth \$200 per ton, it contains some gold and a little silver; the district of country in which the three veins have been discovered is represented as maintaining the same general characteristics for many miles around.

As I have never been into the interior of the State at all, I have thought that I could spend a fortnight at these mines and their neighborhood, quite pleasantly and perhaps profitably.

We have now in Santa Barbara a great curiosity, it is an Indian woman who has lived for eighteen years alone upon the island of San Nicholas—a small island about forty-five miles from this place, during which time she has not seen the face of a human being. This island was once peopled by a tribe of Indians, to whom the North West tribes were hostile. To preserve the remnant of this tribe from destruction as well as with a view to christianise them, the Padres induced them to come to the main land eighteen years ago. After they were all on board the vessel sent for them, this woman swam ashore to look for her child which had been left; and a storm springing up in the night, the vessel was compelled to put to sea; on returning, she could not be found. She was known to be alive by those who at times visited the island for the purpose of hunting otters, from the marks of fires and from foot prints in the sand. On

island for the purpose of hunting otters, from the marks of fires and from foot prints in the sand. On being approached the other day she manifested much joy which she betrayed by signs of the most significant character, and at once commenced packing up her few articles of furniture. Whether the sounds which she utters are words or not, has not yet been ascertained. The man who found her is familiar with five or six Indian languages, but he was unable to understand a single expression; it is more than probable that she has forgotten her native tongue entirely. Her clothing consisted of skins of birds, sewed together with the fibres of some tree or plant. Her food has been shell fish, seals, and a small bulbous root, similar in appearance to an onion, but wholly tasteless. The needles with which she stitches her garments are made of the sharp bones of a fish. She had two hooks made of a bent nail and sharpened by friction upon a stone. Her lines were beautifully twisted from the sinews of some animal, probably a species of fox which abounds on the island.

Her age, as near as can be estimated, is about 55 or 60. Her features are quite masculine, and her hair of the color of dark brown, and very fine. This is quite remarkable for an Indian; their hair you know, is always jet black and coarse. In some future letter I will give you a more extended account of this marvel of the 19th century. She is truly an object for the reflection of the philosopher and the inspection of the curious.

Yours &c.

C.
